

Furniture logistics is not just our business. It's our passion.

The wellbeing of your products is our main concern. It's our responsibility to collect them. To store them. To deliver them when agreed, in the right configuration and to the right destination.

But furniture is not just our business. It's our passion. We care for them. Make sure no harm comes to them. That they arrive at their destination without any scratches. More than 99,96% of all packages we deliver are without damages.

It's because we love your furniture.

Meet the Furniture Logistics Experts

Regardless of if it's a mission to create the smartest logistics solution or carry a new sofa in to the home of a family, it's people that makes the difference. Their ability to think out of the box, to be flexible, service minded and always see solutions instead of problems. Which in turn is the result of experience, competence and a positive mindset.

The people of LGT Logistics have all that. And they use their skills every day to make sure that your goods are well taken care of and delivered on time at the right spot without any damages.

We are the Furniture Logistics Experts. And we love your furniture.

You can trust us to take responsibility

We have an impact on the world around us. As carrier, supplier, employer, company, buyer and corporate citizen. That's why we always act responsible. In being transparent and both think and act preventive. To us, it's important to be a company with a sustainable long-term vision.

But just living up to the requirements imposed, to follow the rules and regulations, is not enough for us. We strive, as far as possible, to take one step further. To set an example for our industry.

Every day we actively work for a sustainable development, both economically, socially and environmentally.

We support the UN initiative Global Compact and their 10 principles for human rights, labour, environment and anti-corruption.

LGT Logistics is the leading furniture logistics specialist in the Nordics. Tailor made concepts for furniture manufacturers, importers, wholesalers and retailers, combined with high quality transports have earned LGT Logistics the trust to handle the furniture logistics for many well-known furniture companies in the Nordics. The Group has an approximately EUR 80 million turnover with more than 400 employees, with offices and warehouses in Sweden, Denmark, Finland and Lithuania.

LGT Store Delivery Furniture delivery to your stores. Smooth, safe and on time.

We know what it takes to make a furniture store manager happy. Which is no coincidence, we have more than four decades of experience with international furniture transport to the furniture retail industry. We know how important it is to be adaptable, to offer fast and flexible delivery times and to keep them. To offer a high level of service and to communicate.

That's why we are the furniture industry's preferred choice. Every week we distribute a total of 35,000 cubic metres of furniture, from factories and warehouses to stores in the Nordic countries and in Europe via our terminals in Sweden and Denmark.

And we transport nothing but furniture, which means that we know how to handle goods that aren't neatly tucked into boxes; goods that need some extra love and care. So you can feel safe that your products will arrive to your store without a scratch – more than 99,96% of all packages we deliver are without damages.

If you would like to make your store managers life even easier, you could add our service LGT Consolidation Warehousing. Then we subsequently pick up goods from different suppliers, store it in our warehouse and make a consolidated delivery according to your preferred delivery time when everything has arrived.

LGT Home Delivery Safe home delivery services. Great end user experience.

When we make home deliveries, we represent your company. The service and flexibility we offer, the way we handle the delivery, the way we act – it all reflects back on you.

That's why we offer a home delivery service that is based on your customer's needs. We deliver when they are home, we offer narrow time slots so that they don't have to be home, waiting for hours. Our drivers are service minded and socially skilled.

With LGT Home Delivery you can rest assured that your goods are safely delivered on a time convenient for your customer and with a great end user experience.

We give you and your customer transparent information from initial order creation to delivery to the private end customer, thanks to a set-up involving several local depots. The furniture is delivered from these depots using small vehicles, with either a single driver delivering on the curb, or with two drivers hand-delivering the goods and placing it where your customer wants it. As add-on, the customer can select to have the packaging removed, the used piece of furniture collected and/or get help with minor assembling.

LGT Office Delivery Precise office delivery services. With special care.

Are you an office furniture manufacturer or seller and want to deliver furniture to a company's local offices all over Scandinavia? Or maybe to a smaller company, that's redecorating its entire premises, from desk and shelving to fifteen furniture?

Regardless of your scope – if you are a company that supply offices with furniture, we have you covered all the way.

With LGT Office Delivery your furniture can be delivered to commercial premises of all sizes at one or multiple addresses, regardless of company size or industry.

We will advise the recipient of the shipment and deliver the order to the client inside the office building – safely and on the agreed time.

LGT Warehousing Long- or short-term furniture storage and handling. Managed by experts.

If you're looking for a smart, safe, economical way to handle and store your furniture, we have the perfect solution. With LGT Warehousing you will get a modern warehouse with correct temperatures and air humidity for furniture. And a skilled staff with several years of experience in furniture handling. With our large facilities in the Nordics we always have the capacity to help you, even at short notice.

Included in the services are incoming deliveries, picking from storage and handling. We manage picking orders, both from on- and offline stores, when a store sells a piece of furniture or when the online customer presses "order". We handle all transactions immediately and the stock is updated in the same instance.

All our services are managed via our WMS system, ensuring a high level of efficiency and quality of information. And of course you will have the same contact person at LGT, regardless if it's a matter of handling booking, delivery or invoicing.

LGT Project Delivery Managing the logistics of your furniture project. With total control.

Sometimes you have a larger project. For example, deliveries to a new hotel or office building. Projects where you need to collaborate with other stakeholders and project owners, deliver furniture on designated time slots, or temporarily store products and parts so you can ship a complete consignment at the right time.

The easiest way to deal with your projects furniture logistics is to use our service LGT Project Delivery.

We will then manage it all, based on your needs and wishes. We will handle transport, cross-docking, storage in a warehouse and carrying of the goods into the premises at the right destination and at the right time. We can also carry the goods inside and, if relevant, manage the disposal of old furniture.

LGT International International furniture deliveries and sourcing. Our resources meet your needs.

The furniture business has changed structure over the year. Production has been outsourced to the Far East or to Eastern European countries. And Scandinavian design brands are now being sold in more countries all over the world than ever before. Therefore the furniture business needs a strong partner when it comes to in- and outbound logistics.

With our extensive international network, we have the resources to collect your goods directly from your factories or suppliers. For those international shipments that are coming from or going to countries where LGT is not present, rest assured, with MACH3000 Alliance your goods are picked up or delivered with experienced hands. The alliance consists of logistics companies that are, like LGT, focused on furniture logistics. Therefore, we have European wide network of furniture logistics, created for you.

LGT Supply Chain Management Optimizing your furniture supply chain. Every day.

With the vast experience we have gained over the years of furniture business, we have developed a huge knowledge. And that knowledge we want to share with you.

With LGT Supply Chain Management we can change your supply chain into a true value add and a competitive advantage. We will work together with you, as one team and as partners, to optimize your supply chain, to mitigate the possible risks, to save money and to create added value supporting your sales.

LGT Consolidation Warehousing Consolidated delivery on your terms. Optimized, secure and sustainable.

With LGT Consolidation Warehousing life gets easier. No need for manned entry docks all the time. No need for inefficient use of storage space in the stores.

In short, instead of delivering different parts and shipments as they arrive, we compile, sort and store them at our warehouse until everything ordered is here. It could be parts of an order that is delivered from different factories or suppliers, or different furniture ordered online by the customer.

When the order is complete, we deliver it to the store or the customer as one complete consignment, optimally loaded and environmental friendly. Either on a scheduled time or on a time that you decide. LGT Consolidation Warehousing offers you convenient deliveries with reduced environmental impact and a competitive price.
