COVID-19 update from LGT

Dear customer.

As informed yesterday, LGT is closely monitoring the situation around Covid-19. Especially after the new restrictions introduced by the Danish Government yesterday evening.

As we speak, all activities at LGT continue unchanged – both at our office and warehouse. This with a few exceptions in the Southern part of Europe in the “red zones” where delay might occur.

If the official guidelines for travelling should change – with concrete effect for our drivers, we might be forced to interrupt the distribution. And as a consequence we might be forced to cancel some routes for a while.

If the volume from our customers should decrease drastically in the near future, we will consider and decide – route for route – the need for an alternative delivery schedule. Or maybe even a cancellation of some routes / service of some markets.

Should this be the situation, LGT will keep all customers closely informed.

Kind regards

Poul Erik Dahl
